

ADITYA BHUSAL

Full-Stack Developer & AI Engineer

☎ +91-8217785322 ✉ adibhusal01@gmail.com 🔗 linkedin.com/in/aditya-bhusal 🐙 github.com/Rozer402 🌐 Portfolio

Summary

Full-Stack Developer and AI Engineer with hands-on experience across the MERN stack, Next.js 14, and FastAPI, building and deploying production-grade web applications end-to-end. Experienced integrating Generative AI and LLM workflows (LangChain, RAG pipelines, Groq and Gemini APIs) into practical, real-world tools. Comfortable owning a project from Figma wireframe through cloud deployment, with a focus on clean architecture, REST API design, and authentication systems that hold up under real usage.

Skills

- **Languages & Frameworks:** JavaScript, TypeScript, Python, React.js, Next.js 14 (App Router), Node.js, Express.js, FastAPI, React Native
- **AI / GenAI:** LangChain, RAG Pipelines, Prompt Engineering, Groq API, Gemini API, HuggingFace, Ollama, Sentence-Transformers
- **Databases & Backend:** MongoDB, MySQL, PostgreSQL, SQLAlchemy 2.0 (async), REST API Design, JWT Authentication, Redis
- **Cloud & DevOps:** Vercel, Railway, AWS (EC2, S3), Docker, Git/GitHub, GitHub Actions, CI/CD Pipelines, Agile/Scrum
- **UI/UX & Tooling:** Figma, Tailwind CSS, Responsive & Mobile-First Design, React Query, Wireframing & Prototyping

Currently Building

MindBridge AI – AI-Powered Mental Health Support Platform | GitHub

2025

- Building a full-stack mental health support platform implementing the architecture from a published IEEE paper (ICDSBS 2025) on few-shot prompting and vector embeddings; semantic relevance filtering with Sentence-Transformers (all-MiniLM-L6-v2) and FAISS against a curated 200-pair corpus, feeding a 5-shot prompt to the Gemini API for context-aware, empathetic responses.
- Designing the system privacy-first per the paper's ethical guidelines: anonymous, session-only memory with zero persistent data storage, plus a keyword and semantic crisis-detection layer that surfaces hotline resources — with a FastAPI backend and a calm, accessible Next.js 14 frontend.
- **Tech:** FastAPI, Next.js 14, FAISS, Sentence-Transformers, Gemini API, RAG

Projects

Argus – AI Code Review GitHub Action | GitHub

2025

- Built and shipped an open source GitHub Action that automatically reviews pull requests using Groq's Llama 3.3 70B — posts structured inline comments with severity classification (CRITICAL / WARNING) and a risk summary table on every PR. Zero infrastructure, runs entirely on GitHub's free compute.
- Designed a full LLM prompt pipeline: fetches PR diffs via GitHub REST API, routes each changed file through a structured prompt, parses JSON-only responses, validates line mappings, and posts formatted inline review comments via Octokit — all in under 30 seconds per PR.
- **Tech:** Node.js, GitHub Actions, Groq API (Llama 3.3 70B), Octokit, Prompt Engineering

School ERP – Full-Stack School Management System | GitHub

2025

- Architecting a full-stack ERP system covering fee management, attendance, library, notices, and student profiles, with a Next.js 14 (App Router) frontend deployed on Vercel and a FastAPI backend backed by PostgreSQL, SQLAlchemy 2.0 (async), and Alembic migrations.
- Implemented SSR-based authentication using httpOnly cookies, including handling cross-origin cookie behavior between the Next.js frontend and FastAPI backend; added a command palette (Ctrl+K) for fast navigation and React Query for server-state management.
- **Tech:** Next.js 14, TypeScript (strict), FastAPI, PostgreSQL, SQLAlchemy 2.0, Redis, Tailwind CSS, React Query, Vercel, Railway

HireOS – Hiring & Workflow Management Platform | GitHub

2024

- Developed a full-stack hiring management app with candidate tracking workflows; deployed frontend on Vercel and backend on Railway, practising cloud hosting and deployment coordination.
- Designed the React UI with a focus on clean, user-friendly workflows and connected it to an Express REST API with role-based access and JWT authentication.
- **Tech:** React, Node.js, Express, MongoDB, Vercel, Railway

Education

CMR Institute of Technology (CMRIT), Bengaluru

2023 – 2027

Bachelor of Technology (B.Tech) – Computer Science Engineering

- 4th Year student (7th Semester) specializing in Full-Stack Development and AI/GenAI Applications; coursework in DBMS, OS, AI, ML, Deep Learning, Web Development
